

# ELECTRIFYING REBATES

Learn about rebates on all-electric appliances and energy efficiency from the following organizations:

## **BayREN**

BayREN sets you up with a free personal home energy advisor who guides you step by step: Visit [bayren.org](http://bayren.org) or call (866) 878-6008

## **SWITCH IS ON**

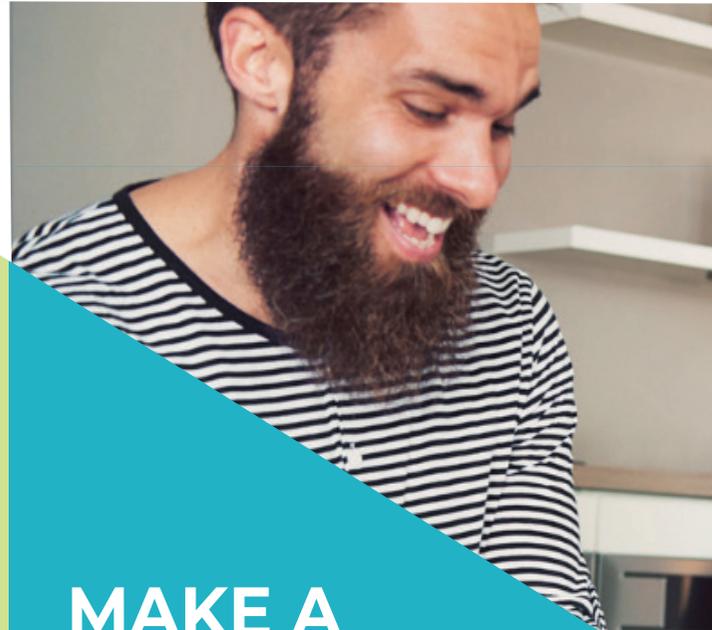

Rebates available for heat pumps, induction cooktops, electric dryers, insulation, air sealing, and more: [switchison.org](http://switchison.org)

## **EAST BAY COMMUNITY ENERGY (EBCE)**

EBCE offers rebates that save you money while helping you go electric: [ebce.org](http://ebce.org)

## **CA Energy Smart Homes**

An incentive program for residential new construction and whole home electrification alterations. Apply at: [caenergysmarthomes.com](http://caenergysmarthomes.com)

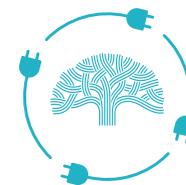

CITY OF  
**OAKLAND**

# MAKE A PLAN TO GO 100% ELECTRIC

For more information, visit [www.oaklandca.gov/projects/electrify](http://www.oaklandca.gov/projects/electrify).

# OAKLAND IS ELECTRIFYING

## HEALTH

Methane gas (otherwise known as natural gas) creates indoor air pollution and increases risk of respiratory illness, cardiovascular disease, and other long-term health issues. In California, one out of every five childhood asthma cases are caused by living with a gas stove.

## SAFETY AND RESILIENCE

Eliminating gas from buildings removes a source of fire and explosion. After a major earthquake or disaster, electricity can be restored faster than gas pipelines can be repaired. As more solar and wind are added to the electric grid every year, smart electrification will increase the grid's overall resilience.

## COMFORT

In addition to being efficient, heat pumps keep your home at a constant temperature and have cooling capabilities.

Everyone deserves to live in a safe and healthy home, and electrification will help us get there. Building electrification means switching gas appliances with electric ones. The benefits are clear!

WATER HEATING

HEATING/ COOLING

COOKING

CLOTHES DRYING

VEHICLES

EFFICIENCY

## JOBS

The transition to cleaner and safer buildings requires more contractors, technicians, and other workers. Replacing gas systems with efficient systems powered by clean electricity is bringing many well-paying jobs to Oakland residents.

## COST

Gas rates are rising faster than electricity rates—a trend likely to accelerate over time. Pairing electrification with efficiency and/or solar can reduce your energy bills over time.

## CLIMATE

Replacing gas appliances with electric ones powered by clean energy is one of the most impactful climate actions we can take. Oakland's electricity, supplied by East Bay Community Energy, is mostly renewable, and will be 100% renewable by 2030.
